Completeness is a new comedy by Itamar Moses about interdisciplinary science and relationships, focusing on a microbiologist and computer science graduate students. When Elliot builds a computer program to help Molly with her research project on protein interactions, the variables in their evolving relationship shift as rapidly as the terms of their experiment. But life is complex and the most sophisticated algorithm cannot predict every possibility in life.

A brief discussion will follow on interdisciplinary approaches and computational biology.

WoW cultural events are part of the WoW social activities that help promote the participation of women in science by establishing strong networks of support and exchange of various academic and personal issues that strengthen connections and raise awareness of key issues to help support women in their studies and retain them in the sciences.

All Are Welcome.
